## **ELECTION/RESTRICTION**

This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

There are four species of tank embodiments: The species of Fig. 8, the species of Fig. 9, the species of Fig. 10, and the species of Fig. 11. There are four species of tube embodiments: Stamped sheets with integral reinforcement, stamped sheets with reinforcement insert, extruded tube, folded metal sheet.

Applicant is required, in reply to this action, to elect a single species of tank embodiment (one of Figs. 8, 9, 10, or 11) and one species of tube embodiment to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the

election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

The claims are deemed to correspond to the species listed above in the following manner:

Claim 7 corresponds to Fig. 8 embodiment, claims 8, 13, and 14 correspond to the Fig. 9 embodiment, claim 9 corresponds to the first tube embodiment, claim 10 to the second tube embodiment, claim 11 to the third tube embodiment, claim 12 to the fourth tube embodiment, claim 15 corresponds to the Fig. 11 embodiment.

The following claim(s) are generic: Claims 1-6 and 16.

The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: The prior art cited in the PCT search report (form 210) indicates a lack of novelty or inventive step for the generic claims; thus, the common features of these generic claims which the specific claims noted above share cannot be asserted to be "special technical features", since they fail to define a contribution which the claimed invention makes over the prior art<sup>1</sup>. Thus, unity of invention is lacking, and an

<sup>1</sup> 37 CFR 1.475. Unity of invention before the International Searching Authority, the International Preliminary Examining Authority and during the national stage.

(a) An international and a national stage application shall relate to one invention only or to a group of inventions so linked as to form a single general inventive concept ("requirement of unity of invention"). Where a group of inventions is claimed in an application, the requirement of unity of invention shall be fulfilled only when there is a technical relationship among those inventions involving one or more of the same or corresponding special technical features. The expression

election requirement in this national stage application is considered proper. See 37 CFR 1.499.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

"special technical features" shall mean those technical features that define a contribution which each of the claimed inventions, considered as a whole, makes over the prior art.
